

## Help at home for Level 6

In order to pass Level 6 you need to know all of these subtraction facts:

$$1 - 1 = 0$$

$$2 - 1 = 1$$

$$3 - 1 = 2$$

$$4 - 1 = 3$$

$$5 - 1 = 4$$

$$6 - 1 = 5$$

$$7 - 1 = 6$$

$$8 - 1 = 7$$

$$9 - 1 = 8$$

$$10 - 1 = 9$$

$$11 - 1 = 10$$

$$12 - 1 = 11$$

$$13 - 1 = 12$$

$$14 - 1 = 13$$

$$15 - 1 = 14$$

$$16 - 1 = 15$$

$$17 - 1 = 16$$

$$18 - 1 = 17$$

$$19 - 1 = 18$$

$$20 - 1 = 19$$

Remember taking away one is like counting backwards in ones or saying the number before.

Try and learn them in different orders as well.
