

Help at home for Level 12

In order to pass Level 12 you need to know all of these addition pairs to 100- they are all multiplies of ten (in the 10 x table):

$$0 + 100 = 100$$

$$10 + 90 = 100$$

$$20 + 80 = 100$$

$$30 + 70 = 100$$

$$40 + 60 = 100$$

$$50 + 50 = 100$$

$$60 + 40 = 100$$

$$70 + 30 = 100$$

$$80 + 20 = 100$$

$$90 + 10 = 100$$

$$100 + 0 = 100$$

Remember all addition facts can be written with either number at the beginning and have the same answer.

60 + 40 = 100 can also be written as **40 + 60 = 100**

Knowing your number facts to 10 (level 2) will help you to learn these facts to 100!

100 is ten times bigger than 10, so all your number bonds to 10, need to be ten times bigger (x10).
