

Help at home for Level 14

In order to pass Level 14 you need to be able to add 10 to any two digit number.

E.G.

$$43+10=53$$

$$32+10=42$$

$$51+10=61$$

$$68+10=78$$

Remember all addition facts can be written with either number at the beginning and have the same answer.

23 + 10= 33 can also be written as **10 + 23 = 33**

Remember when adding 10 to any number the units column stays the same (doesn't change).

Ask:

- **“What do you notice about the tens column?”**
- **“What do you notice about the units column?”**
